

Aurora Mobile's Modellix.ai Brings Unified AI Model Access to ComfyUI Creative Workflows

October 30, 2026

SINGAPORE, Oct. 30, 2026 (GLOBE NEWSWIRE) -- Aurora Mobile Limited (NASDAQ: JG) ("Aurora Mobile" or the "Company"), a leading provider of customer engagement and marketing technology services, announced that [Modellix.ai](https://docs.modellix.ai/ways-to-use/comfyui), its one unified platform for all AI media generation, is now available for ComfyUI. The integration gives creators and developers another way to use image, video, and audio models available through Modellix.ai, directly within visual, node-based workflows.

[Modellix.ai](https://docs.modellix.ai/ways-to-use/comfyui) for ComfyUI extends the platform into a visual, node-based environment where technical creators and developers can test model capabilities, demonstrate generation processes, and build reusable media generation workflows. Users can connect with their existing Modellix.ai API key, select a live model, configure its current parameters, attach media inputs, and send generated images, videos, or audio to native ComfyUI preview and save nodes.

Bringing Unified Model Access to ComfyUI Workflows

The ComfyUI integration extends Modellix.ai's unified model access into a visual workflow environment. Creators can combine image, video, and audio generation steps on a canvas and reuse the resulting workflow across projects. Developers can work with live model schemas and native media connections without creating a separate ComfyUI package for each model provider.

The integration supports live model selection, media uploads, ordered reference inputs, asynchronous generation, and retrieval of existing tasks. Importable examples cover image generation, frame-to-video workflows, speech generation, and task recovery.

"The next phase of AI media adoption will be shaped by workflow fit as much as model quality," said **Chris Lo, Founder and CEO of Modellix.ai**. "Creators and developers will use different tools for different tasks, and the model layer must be able to move with them. Modellix.ai is building that portable access layer, giving users a consistent way to work with leading models while remaining in the environments that best suit their production process."

Modellix.ai for ComfyUI is available now through Comfy Registry, ComfyUI-Manager, and GitHub. For more information, please visit <https://docs.modellix.ai/ways-to-use/comfyui>.

About Modellix.ai

[Modellix.ai](https://docs.modellix.ai/ways-to-use/comfyui) is Aurora Mobile's premier unified platform for AI media generation. It enables developers and enterprises to generate, track, and scale content using world-class models through a single, secure, and transparent API.
